P: 780-451-8984  
F: 780-447-4246  
E: [Mark@here2there.ca](mailto:Mark@here2there.ca)

# Background

Gone (mostly) are the days when the evaluator was the expert and stakeholders were anxiously awaited their feedback and judgement. In today's world, initiative stakeholders can play a key role in every step of the evaluation, from establishing questions to making sense of results.

This is particularly true when working with complex challenges where stakeholders have very different - even conflicting - values, interests and power and everyone's perspective and voice is required.

## Responding to Complex Challenges

Experimental

Collaborative

Systemic

# Complex Challenges

---

## TRIADS

- Your name, home and passion.
- What brought you to this session today?

# Intent & Agenda

- The Foundation
- Three Approaches
- Exemplar Methods
- Discussion

# Foundations

---

What, Why, Who, When, Where and How

# What

Participatory evaluation is an approach that involves the stakeholders of a program or policy in the evaluation process.

fresh spectrum

Why are you interested in employing participatory evaluation?

# Why

There are multiple reasons to be participatory.

---

1. Relevance – improves the prospects that the evaluation is focused on the issues and questions that stakeholders want to assess.

---

2. Richness – broadens perspectives, experiences and data used to answer evaluation questions.

---

3. Ownership – increases the chances that the results of the evaluation are used to make decisions.

---

4. Meaningful Voice & Power – allows a great range of voices to be heard (aka ‘nothing about us without us’), speak truth to power and use evaluation as a change-making tool.

---

5. Capacity – expands the number and variety of ways to gather and analyze data.

---

6. Other?

Who are your users?

# Who

---

Are the stakeholders or users?

---

1. Primary Users – people who make use evaluation process and/or findings to make decisions about the intervention.

---

2. Secondary Users – people who may influence the intervention with evaluation process and findings.

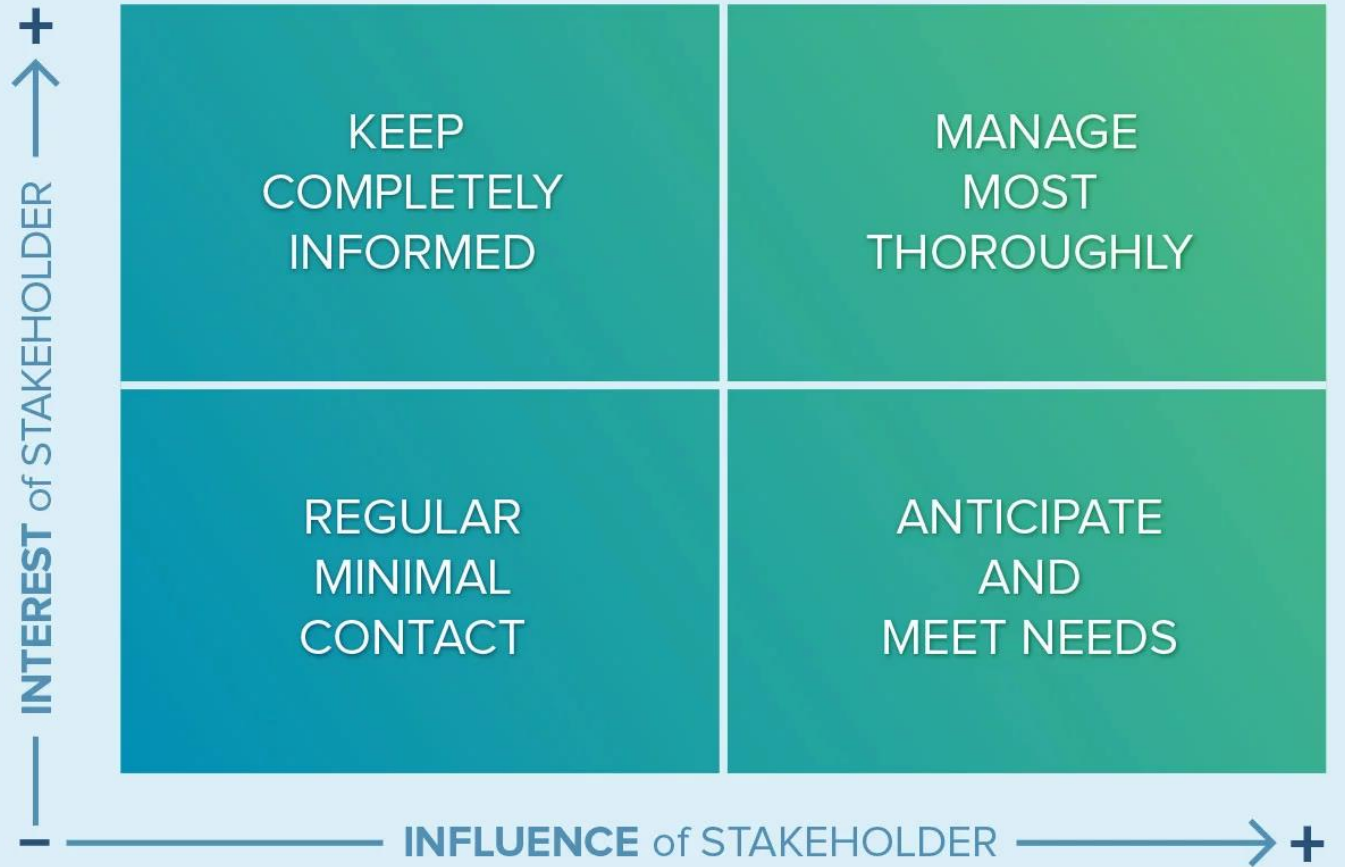

---

3. Tertiary – may use evaluation process and/or findings but don't influence intervention or evaluation.

# Who

Are the stakeholders or users?

## Stakeholder Map: Who Needs What?

# When

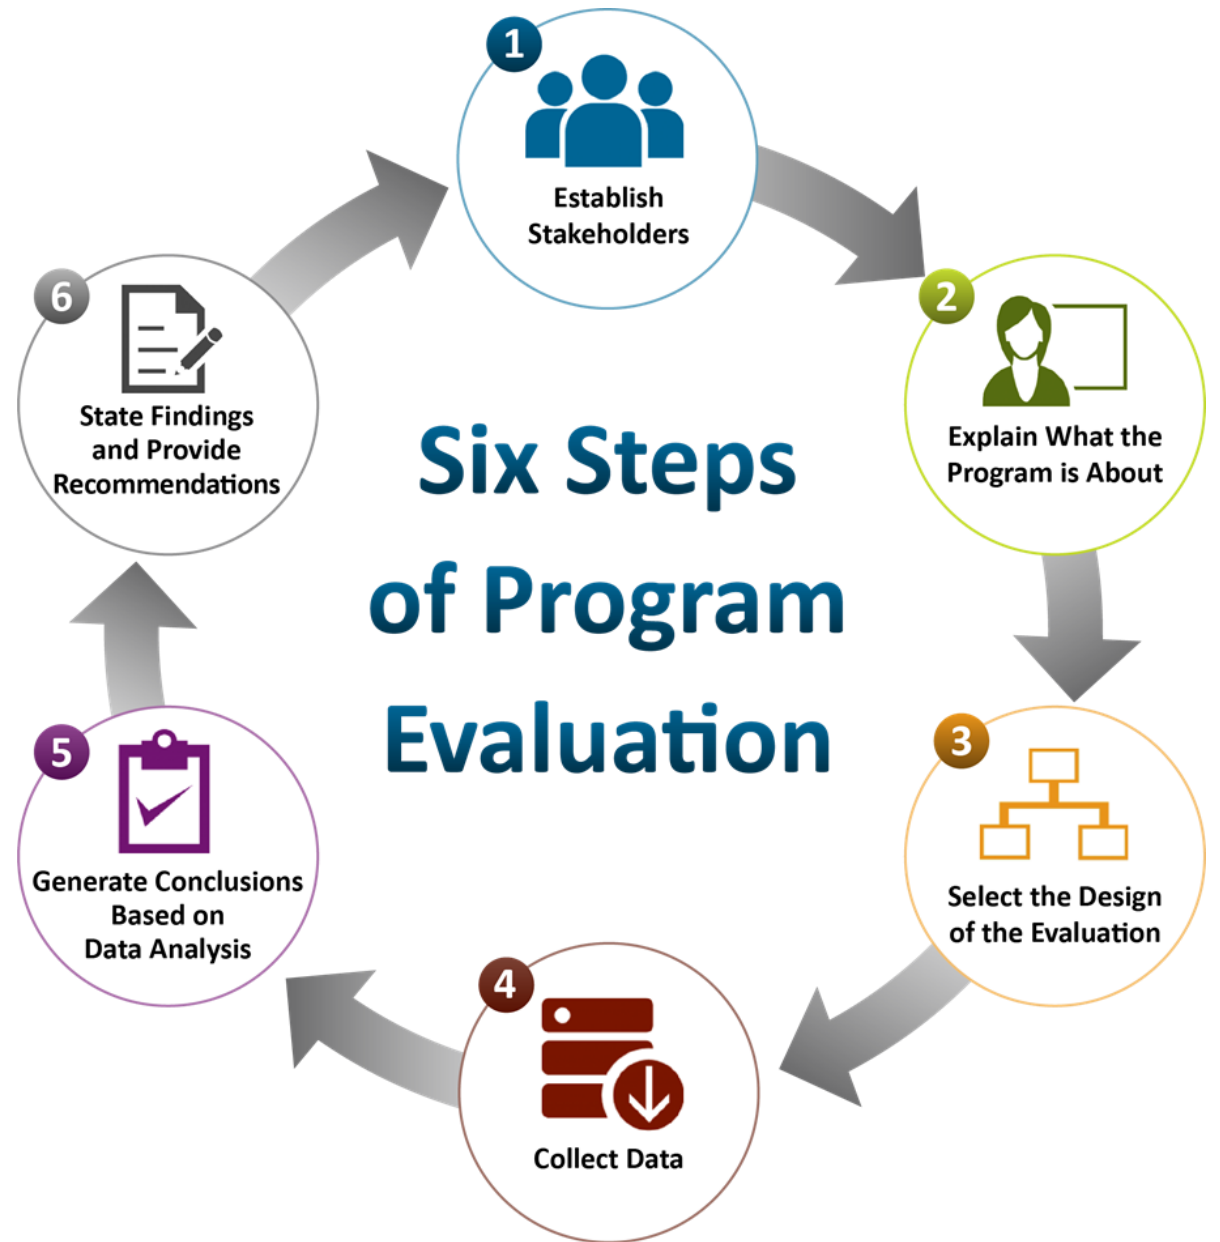

---

There are multiple reasons or purposes to be participatory.

Purpose	Description	Example
<b>Developmental</b>	To help develop and/or continually adapt an intervention.	A network of funders and grantees begin experimenting with a new
<b>Formative</b>	To improve an intervention so that its more effective.	A coalition of agencies addressing homelessness explore how well they follow their guiding principles and how they might improve.
<b>Summative</b>	To judge the merit or worth of an intervention to help decide is future.	A group of agencies, a capacity building organization and design firm assess the results of a pilot project to determine if it should be expanded.
<b>Monitoring</b>	To track the routine operations of an intervention to ensure things are on track and/or surface issues that warrant further investigation.	Tracking Monarch Butterfly migration patterns across North America.
<b>Accountability</b>	To assess whether funds are managed well, program is following key standards and guidelines, and plans are being implemented as promised.	Participants, experts and agency staff working on mentoring models complete an audit to see if funds were used well and program operating to standards.
<b>Knowledge Building</b>	To gather and make sense of evaluative data to generate lessons and principles to inform future efforts.	The participants, funders and facilitators of an innovation lab on racism come together to identify lessons learned for future labs?

# Where

You can employ participatory approaches in all steps of an evaluation process.

# Where

---

You can employ participatory approaches in all steps of an evaluation process.

# How

---

Its not a recipe – it's a set of (emerging) principles that provide guidance on how to employ participatory approaches in diverse contexts.

PRACTICE/RULE

PRINCIPLE

# Discussion

What new insights and questions emerge from this quick review of the foundational ideas of participatory evaluation?

# Three Approaches

---

Collaborative, Participatory & Empowerment

# Three Approaches

With your ongoing support  
we can make this evaluation  
a success.

Working together, we will  
make this evaluation a success.

We'll have help, but the success  
of the evaluation is in our hands.

freshspectrum.com

# Collaborative Evaluation

- Where there is a substantial degree of collaboration between the evaluator and stakeholders throughout the process to the extent they are willing and capable to be involved.

- Collaborative evaluators are **in charge** of the evaluation but they continually **engage** stakeholders.

# Collaboration Evaluation Principles

1. **Development** – training to increase learning and improvement
2. **Involvement** – feasible and meaningful engagement
3. **Empathy** – sensitivity and understanding of others
4. **Empowerment** – create sense of efficacy by delegating authority
5. **Qualification** – calibrating involvement to level of stakeholder knowledge and skills
6. **Social Support** – managing relationships and enhancing participation
7. **Trust** – building and enhancing trust throughout

# Participatory Evaluation

- Where evaluators and stakeholders **co-design** and implement an evaluation together.
- They **jointly** own and control the process and findings.

With your ongoing support we can make this evaluation a success.

Working together, we will make this evaluation a success.

We'll have help, but the success of the evaluation is in our hands.

# Participatory Evaluation Principles

1. **Learning** – focus on discovering what does/does not work
2. **Action-Planning** – identify points of action to improve intervention
3. **Participant Focus & Ownership** –structure and process for broad and meaningful involvement
4. **Negotiation Balance of Power** – amongst participants and evaluator
5. **Sharing Control** – shared authority over evaluation process
6. **Objectives Set Jointly** – by everyone acknowledging diverse agendas
7. **Work Out Difficulties Together** – prepared to identify and address challenges.
8. **Flexibility** – adjust for resources, skills and needs of participants

# Empowerment Evaluation Principles

- Empowerment evaluation is a stakeholder involvement approach designed to (1) provide groups with the **tools** & **knowledge** they need to monitor and evaluate their own performance and accomplish their goals and (2) foster **self-determination** & **sustainability**.

With your ongoing support we can make this evaluation a success.

Working together, we will make this evaluation a success.

We'll have help, but the success of the evaluation is in our hands.

# Empowerment Evaluation Principles

1. **Improvement** – empowerment evaluation is designed to help people improve program performance; it is designed to help people build on their successes and re-evaluate areas meriting attention
2. **Community ownership** – empowerment evaluation values and facilitates community control; use and sustainability are dependent on a sense of ownership
3. **Inclusion** – empowerment evaluation invites involvement, participation, and diversity; contributions come from all levels and walks of life
4. **Democratic participation** – participation and decision making should be open and fair
5. **Social justice** – evaluation can and should be used to address social inequities in society
6. **Community knowledge** – empowerment evaluation respects and values community knowledge
7. **Evidence-based strategies** – empowerment evaluation respects and uses the knowledge base of scholars (in conjunction with community knowledge)
8. **Capacity building** – empowerment evaluation is designed to enhance stakeholders' ability to conduct an evaluation and to improve program planning and implementation
9. **Organizational learning** – data should be used to evaluate new practices, inform decision making, and implement program practices; empowerment evaluation is used to help organizations learn from their experience (building on successes, learning from mistakes, and making mid-course corrections)
10. **Accountability** – empowerment evaluation is focused on outcomes and accountability; empowerment evaluations functions within the context of existing policies, standards, and measures of accountability; empowerment evaluations ask: did the program accomplish its objectives?

With your ongoing support we can make this evaluation a success.

Collaborative

Working together, we will make this evaluation a success.

Participatory

We'll have help, but the success of the evaluation is in our hands.

Empowerment

# Discussion

Which of the three stances to participatory evaluation appeals to you most?  
Why?

# Some Exemplar Practices

---

User Profile, Ripple Effect Mapping, Outcome Harvesting and Failure Reports

# Practices

## Today

- User Profile
- Ripple Effect Mapping
- Outcome Harvesting
- Failure Reports

## Tomorrow

- Most Significant Change
- Collaborative Outcome Reporting
- Rapid Rural Appraisal
- Evaluation Rubrics
- Gender-Based Analysis
- Indigenous Evaluation
- Equitable Evaluation
- Critical System Heuristics

## User Profile Worksheet

Primary User	QUESTIONS: What are your evaluation questions?	USE: What kinds of decisions will you make with the answers to these questions? (See Tip 1.)	PREFERENCES: What are your preferences for how we design the evaluation or communicate its findings? (See Tip 2.)	WINDOWS: When do you need the evaluation findings?
1.				
2.				
3.				
4.				
5.				

**Tips:**  
 1. Use the Evaluation Table on the following page.  
 2. If primary users are stuck, ask them to share their best evaluation experience, what made it positive, and what they would like to see repeated. Alternatively, ask them about their worst experience with evaluation and what we should avoid in this assessment.

## Examples of User Profile Cards

Hypothetical Wrap-Around Project in Schools for At-Risk Youth

	<p><b>NAME:</b> Ralph Smith  <b>ORGANIZATION:</b> Community Foundation  <b>ROLE:</b> CEO</p> <p><b>QUESTIONS:</b>            1. Is what we're in the program resulting in better outcomes for kids' Grade Three reading rate?            2. Do local schools really want this or are we forcing it on them?</p> <p><b>USE:</b>            • To determine if—and by how much—to extend the three-year grant to project.            • To begin exploring the implications for scaling to new schools.</p> <p><b>PREFERENCES:</b>            • Likes testimonials from students.            • Do not include social return on investment data—board had bad experience with it.            • Likes strong executive summary—rarely looks at full report.</p> <p><b>WINDOWS:</b>            • Funding decision is at the end of June, so foundation staff needs report by May 1.            • Would like to present results to local funders' forum in September.</p>
	<p><b>NAME:</b> Mary Pickford  <b>ORGANIZATION:</b> Rydale High  <b>ROLE:</b> Principal</p> <p><b>QUESTIONS:</b>            1. Is this making a difference in the academic outcomes of kids, particularly in Grade Three literacy levels?            2. How much time is this project taking from teachers? Do they feel it helps or hinders their work?</p> <p><b>USE:</b>            • To sustain and expand support for the collaboration within the school staff and district leaders.</p> <p><b>PREFERENCES:</b>            • Does not want academic metrics outside those already used by school—pleads that we don't spend time on new indicators.            • Would prefer a lunch-hour focus group with teachers rather than surveys or interviews.</p> <p><b>WINDOWS:</b>            • School planning takes place in late May so that they can send next year's plan to the district level for approval. They would like evaluation findings by late March if possible.            • Would like to present results to local funders' forum in September.</p>
	<p><b>NAME:</b> Casey Frenigan  <b>ORGANIZATION:</b> Family Services Bureau  <b>ROLE:</b> Program Director</p> <p><b>QUESTIONS:</b>            1. What is working well and not well in our wrap around model with community agencies and staff?            How can we improve it?            2. Will we be great too this to make our targets if we expand to another school?</p> <p><b>USE:</b>            • To improve the delivery model in the original pilot site.            • To begin exploring the implications for scaling to new schools.</p> <p><b>PREFERENCES:</b>            • Has had success using the Collaboration Factors Inventory as a self-assessment tool in past.            • Wants evaluation findings first and then a facilitated session in which collaboration partners develop conclusions and recommendations together.</p> <p><b>WINDOWS:</b>            • The collaboration members meet in April to do planning for the next year; it's best to have results ready for this session.</p>

- A process to identify the different 'users' of an evaluation, their questions, when they need the evaluation feedback, and their preferences for how the evaluation is designed and implemented.

# Practice 1: User Profiles

# User Profile Worksheet

With your ongoing support we can make this evaluation a success.

Working together, we will make this evaluation a success.

We'll have help, but the success of the evaluation is in our hands.

freshspectrum.com

How would each approach employ a User Profile exercise?

## Practice 2: Ripple Effect Mapping

- Ripple effect mapping is a participatory technique to document the multiple impacts of a project or program.
- It's a participatory approach to 'appreciative inquiry'.
- It can't replace conventional evaluation techniques, but it's a great addition to the evaluator's toolbox.

# The Steps

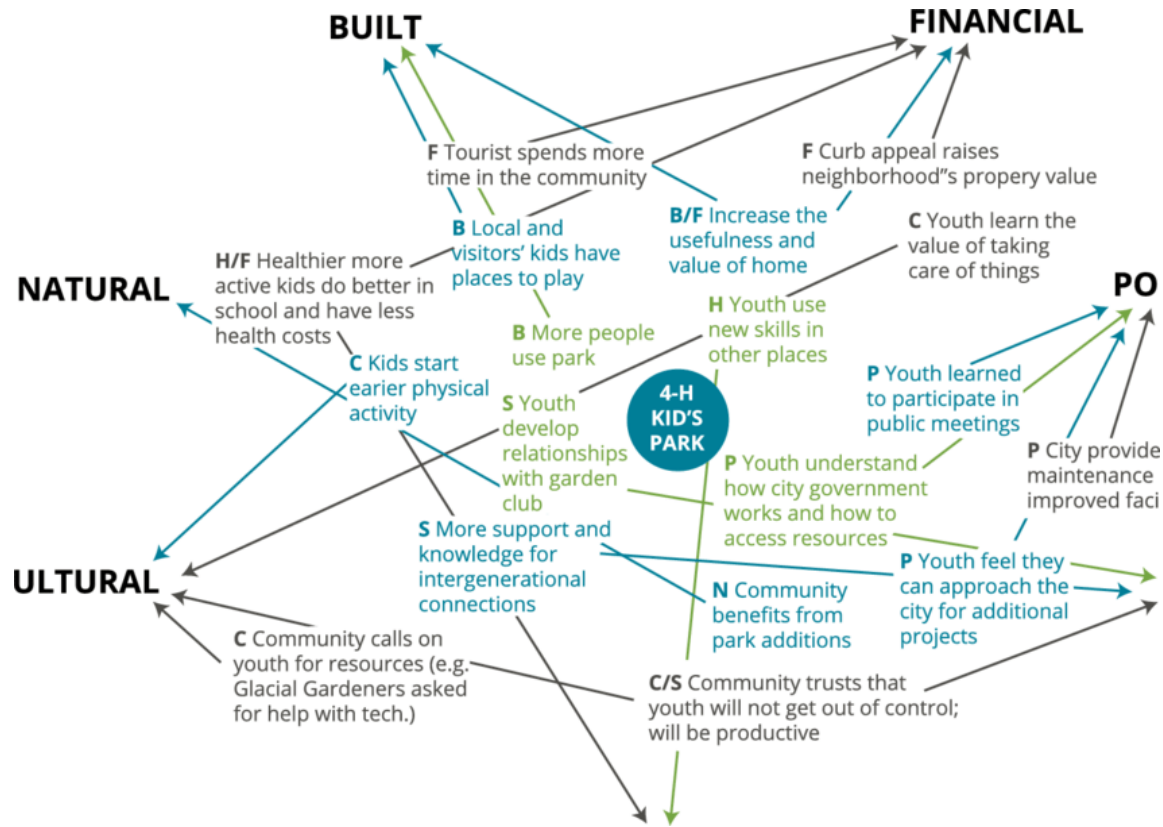

1. Decide whether REM is right for a particular initiative.
2. Schedule the Event & Invite Participants (12-20 ideal)
3. Conduct interviews using Appreciative Inquiry & map results from a mind mapping session
4. Clarify, code, and analyze data.

# Method 1: Ripple Effect Mapping

Example

# Ripple Effect Mapping of the Tourism Assessment Program

## Tourism Assessment Program

Minnesota's Tourism Assessment Program (TAP) analyzes a community's tourism potential. The program includes identification of tourism assets by the community, a site assessment by visiting team of experts, and written recommendations developed by the University of Minnesota Tourism Center and Extension's Center for Community Vitality. Five Tourism Assessment Programs have been conducted in Minnesota communities since 2007. This research identified the changes the program has helped to stimulate.

## Ripple Effect Mapping

Using Ripple Effect Mapping (REM), we engaged program participants and other community stakeholders within three of the communities in discussion groups to identify intended and unintended outcomes and impacts of Tourism Assessment Programs that were conducted in each community 5-6 years ago. Mapping the changes provided stakeholders a powerful visual of the progress they have made toward their tourism development goals. Several long-term impacts have been documented in three main areas: (1) increased community cooperation through relationship building, (2) enhanced marketing efforts resulting from a better understanding of their visitor markets and, (3) expanded awareness of area attractions. Coding results of this study within the Community Capitals Framework (Emery & Flora, 2006) can show each community how their involvement in the Tourism Assessment Program and subsequent development efforts could be targeted to have greater impact in supporting the long term sustainability and vitality of their communities. Utilizing REM to evaluate the program has also helped inform future Tourism Assessment Program design.

## Participating Community Groups

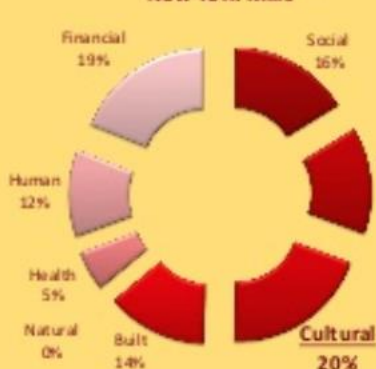

**New York Mills:** 14 participants in REM 2013 discussion group, 20 in original 2007 Tourism Assessment Program.

**Chisago Lakes:** 18 community participants in 2013 REM discussion group, 55 in original 2008 Tourism Assessment Program.

**Fertile:** 22 community participants in REM 2013 discussion Group, 18 in original 2008 Tourism Assessment Program.

For the most part the proportion of influence for each of the capitals was similar across the three communities. The differences really reflected the core aspects of the community's tourism focus.

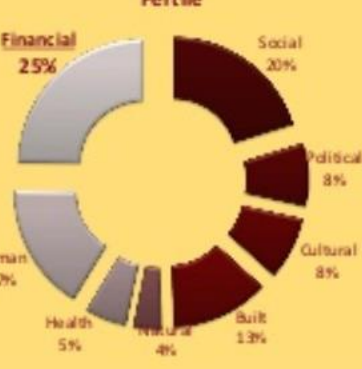

New York Mills

Chisago Lakes

Fertile

New York Mills

### Assets Identified in 2007 TAP

- + Cultural Center
- + Finn Creek Museum,
- + Good regional connections.
- Limited lodging
- Weak community theme

### Mapped Development Impacts in 2013

#### Relationships:

Large local manufacturer (Lund Boats) is more engaged in community.

#### Visitor Markets:

Through new open enrollment policy, a diversifying school student body is facilitating connection with other regional communities.

#### Community Infrastructure:

Farmers market established with support from Extension.

Chisago Lakes

### Assets Identified in 2008 TAP

- + Swedish heritage
- + Lakes
- Limited lodging
- Lack of regional & community collaboration

### Mapped Development Impacts in 2013

#### Relationships:

Tourism Committee with cities & businesses increased communication & collaboration.

#### Visitor Markets:

Participation in Tourism Assessment Program catalyzed joint regional marketing and development efforts.

#### Community Infrastructure:

Expanded lodging definition to include camping. Bought and refurbishing youth camp.

Fertile

### Assets Identified in 2008 TAP

- + Nature based recreation
- + Polk County Fair
- Limited lodging
- Competition with other communities

### Mapped Development Impacts in 2013

#### Relationships:

Participation in Horizons and Tourism Assessment Program helped catalyze deeper engagement between area businesses.

#### Visitor Markets:

Family focused branding of County Fair has increased attendance.

#### Community Infrastructure:

New Agassiz Environmental Learning Center bridge.

Tourism Development, see: Messer, C.C. et al. 2010. *Community Tourism Development*. 3d ed. University of Minnesota Extension.

Ripple Effect Mapping, see Hansen Kollock, D., Ruge, L., Chazdon, S., Paine, N., and Higgins, L. 2012. Ripple Effect Mapping: A "Radiant" Way to Capture Program Impacts. *Journal of Extension* 50(5). Available online at <http://www.joe.org/joe/2012october/t6.php>

Community Capitals Framework, see: Emery, M., and Flora, C. "Spiraling-Up: Community Transformation with Community Capitals Framework." *Journal of the Community Development Society*, 37.1 (2006): Spring, Web. 07 Aug. 2013. <http://intranet.cdaa.ac.ir/intranet/paginas/Mei/Qual/inv/accion/MCA/P2010/Semana7/Documentos/Sem710/Emery & Flora, 2006 Spiraling-up.pdf>

The screenshot shows a web browser window with the URL [extension.umn.edu/community-development/ripple-effect-mapping](http://extension.umn.edu/community-development/ripple-effect-mapping). The article title is "Ripple effect mapping makes waves in the world of evaluation". The text explains that ripples are tiny waves generated when someone drops a stone into the water, and ripple effect mapping is generating some big waves in the world of evaluation. It mentions that Mike Liepold, University of Minnesota Extension Leadership and Civic Engagement educator, used the REM process twice to evaluate the Minnesota Agriculture and Rural Leadership (MARL) program. An image shows a group of people working in a garden. A sidebar on the right lists "Projects and completed studies" including "A rural brain gain migration", "Getting to know Greater Minnesota's economy: 2019 update", "Rural grocery stores", and "Minnesota's communities find housing solutions".

Empowerment

freshspectrum.com

How might each approach ripple effect mapping?

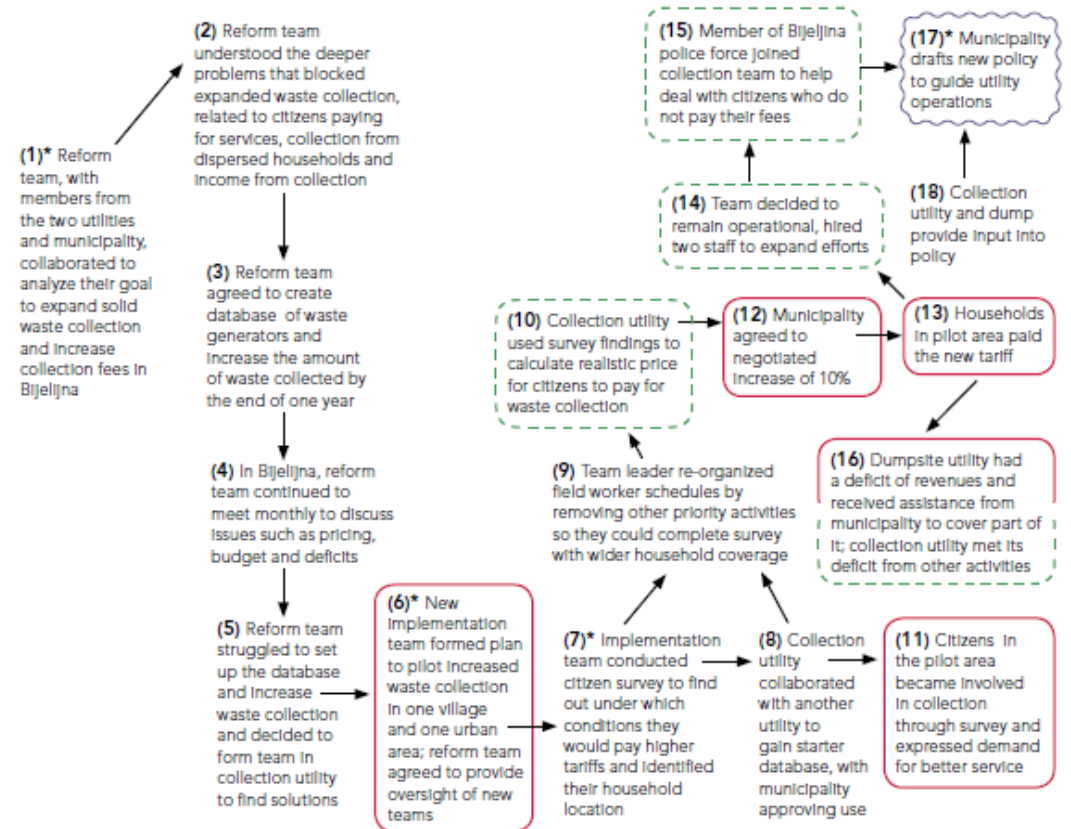

## Practice 3: Outcome Harvesting

- Outcome Harvesting collects (“harvests”) evidence of what has changed (“outcomes”) and, then, working backwards, determines whether and how an intervention has contributed to these changes.
- It has proven to be especially useful in complex situations when it is not possible to define concretely most of what an intervention aims to achieve, or even, what specific actions will be taken over a multi-year period.

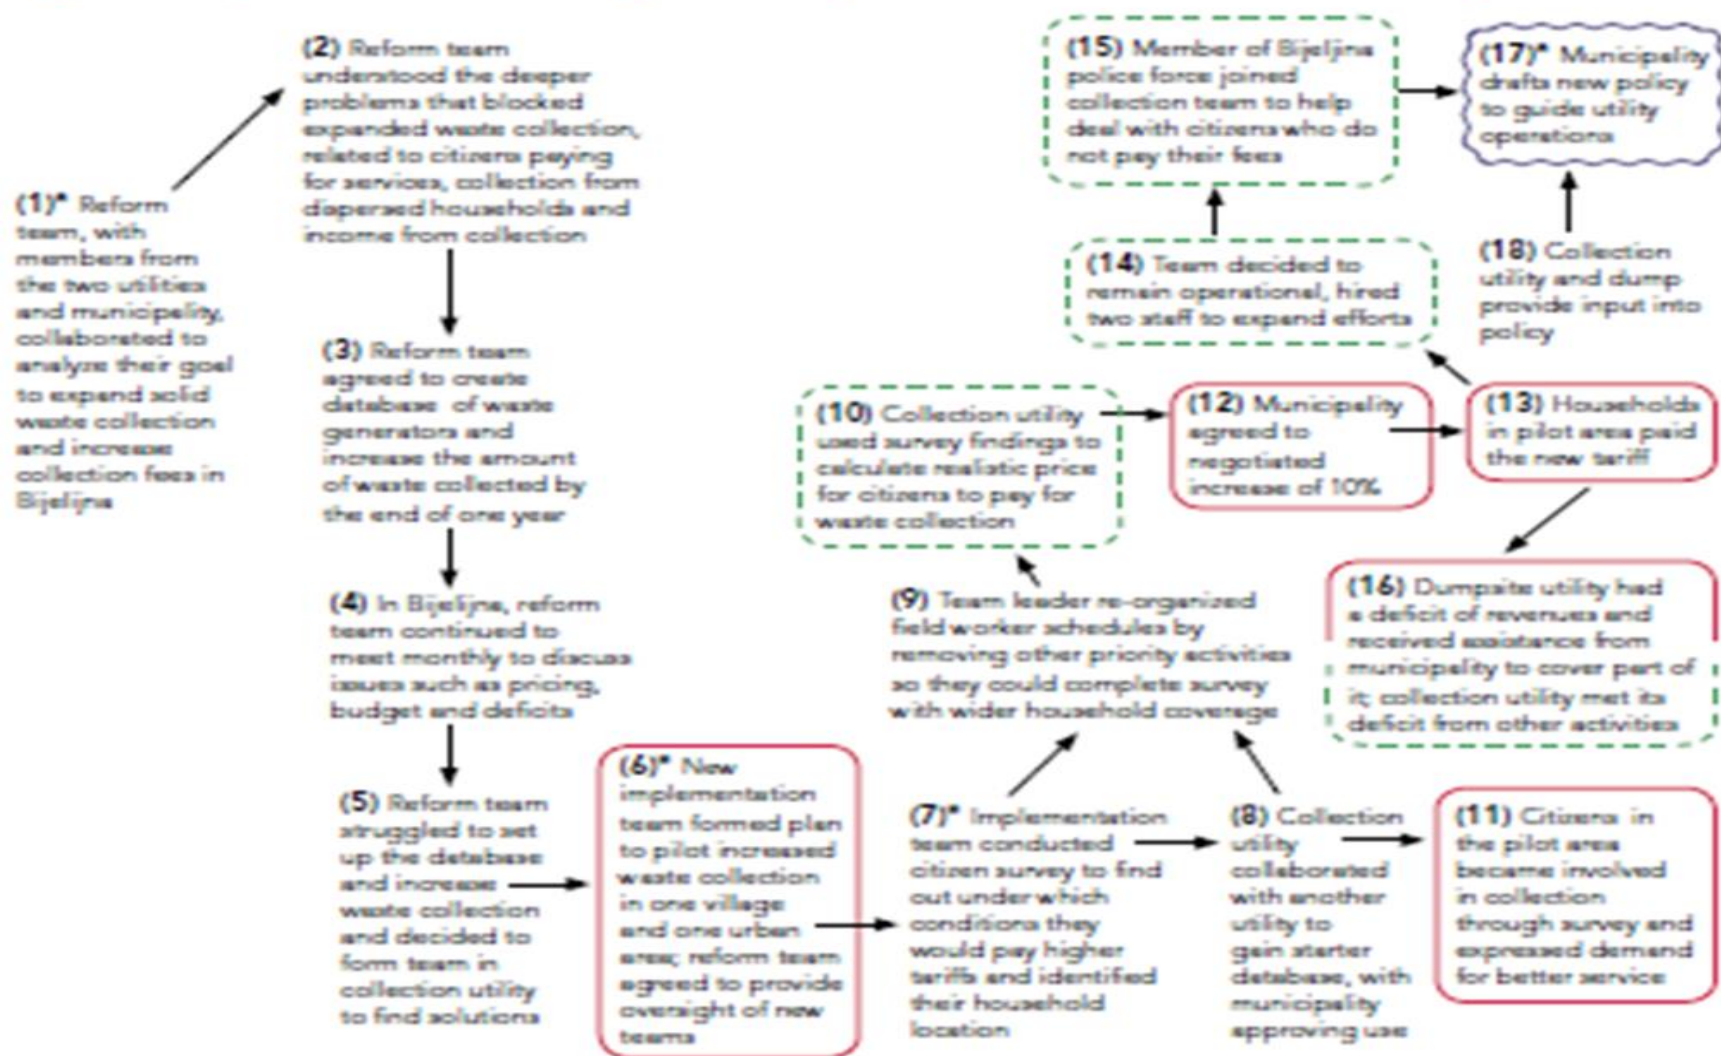

## Implementing Reform Initiatives in Solid Waste Management in Bosnia

2011	2012
<b>Institutional changes</b> Outcomes related to societal, policy and organizational changes — Political commitment, social norms and citizen demand for service improvements ~ Policy improvement for utilities - - - Operational efficiency/responsiveness/financial	<b>Learning/capacity changes</b> Other outcomes related to awareness, knowledge or skills, collaborative action, or the use of knowledge or innovative solutions. * Outcomes selected for substantiation; see sidebar.

How might each approach the intelligent failure loop?

# Discussion

1. What insights emerged for you about how the approach to participatory evaluation affects how you employ different methods?
2. What new questions emerge?

# Additional Resources

---

# Why

---

You can employ participatory approaches in all steps of an evaluation process.

---

1. Relevance – improves the prospects that the evaluation is focused on the issues and questions that stakeholders want to assess.

---

2. Richness – broadens perspectives, experiences and data used to answer evaluation questions.

---

3. Ownership – increases the chances that the results of the evaluation are used to make decisions.

---

4. Meaningful Voice – allows a great range of voices to be heard (aka ‘nothing about us without us’).

---

5. Capacity – expands the number and variety of ways to gather and analyze data.

---

6. Other?

# Why Not

---

You can employ participatory approaches in all steps of an evaluation process.

---

1. **Time & Effort** – participatory evaluation typically (though not always) requires more time and effort to organize.

---

2. **Expertise** – it requires evaluator with both ‘content’ knowledge of evaluation as well as expertise in facilitation and group dynamics.

---

3. **Credibility** – while participatory approaches increase the credibility and legitimacy in the eyes of some stakeholders it may reduce it in the eyes of other.

---

4. **Risk of Stakeholder Bias** – while there is always “bias” in evaluation, it can get amplified in a participatory process.

---

5. **Other?**

## Adaptive Responses to Complex Issues

Experimental

Collaborative

Systemic

Despite the challenges, we'd better get much better at this ...

**PERFORMANCE MONITORING & EVALUATION**

**TIPS**

**CONDUCTING A PARTICIPATORY EVALUATION**

**ABOUT TIPS**

These TIPS provide practical advice and suggestions to USAID managers on issues related to performance monitoring and evaluation. This publication is a supplemental reference to the Automated Directive Service (ADS) Chapter 203.

**USAID is promoting participation in all aspects of its development work.**

**This TIPS outlines how to conduct a participatory evaluation.**

**WHAT IS DIRECT OBSERVATION ?**

Participatory evaluation provides for active involvement in the evaluation process of those with a stake in the program: providers, partners, customers (beneficiaries), and any other interested parties. Participation typically takes place throughout all phases of the evaluation: planning and design; gathering and analyzing the data; identifying the evaluation findings, conclusions, and recommendations; disseminating results; and preparing an action plan to improve program performance.

**CHARACTERISTICS OF PARTICIPATORY EVALUATION**

# Stakeholder Involvement Approaches: Summary of Roles & Principles

COLLABORATIVE	PARTICIPATION	EMPOWERMENT
<b>Roles</b>		
Evaluator as stakeholder, responsive expert and final authority	Evaluator as co-designer, capacity builder and shares authority	Evaluator as facilitator, capacity builder, critical friend
Stakeholders offer key input throughout design, implementation and use	Stakeholder co-design, implement and use findings, sharing authority	Stakeholders lead evaluation and are final authority
Success is improved relevance, breadth, ownership and use of evaluation process and findings by stakeholders	Success is improved relevance, breadth, ownership and use of evaluation process and findings, as well as voice and capacity of stakeholders	Success is improved relevance, breadth, ownership and use of evaluation process and findings, as well as power, agency and capacity of stakeholders
<b>Principles</b>		
<b>Development</b> – training to increase learning and improvement	<b>Learning</b> – focus on discovering what does/does not work	<b>Improvement</b> – build on success, improve performance
<b>Involvement</b> – feasible and meaningful engagement	<b>Action-Planning</b> – identify points of action to improve	<b>Organizational Learning</b> – data used to inform decision-making and new practices
<b>Empathy</b> – sensitivity and understanding of others	<b>Participant Focus &amp; Ownership</b> – structure and process for broad and meaningful involvement	<b>Social Justice</b> – address social inequities in society
<b>Empowerment</b> – create sense of efficacy by delegating authority	<b>Negotiate Balance of Power</b> – amongst participants and evaluator	<b>Community Ownership</b> – facilitate community control
<b>Qualification</b> – calibrating involvement to level of stakeholder knowledge and skills	<b>Sharing Control</b> – shared authority over evaluation process	<b>Inclusion</b> – seeks out, supports and embraces diversity of views
<b>Social Support</b> – managing relationships and enhancing participation	<b>Objectives Set Jointly</b> – by everyone while acknowledging diverse agendas	<b>Democratic participation</b> – open and fair decision-making
<b>Trust</b> – building and enhancing trust throughout	<b>Work Out Difficulties Together</b> – prepared to identify and address challenges	<b>Community Knowledge</b> – respects and draws on different types of community knowledge
	<b>Flexibility</b> – adjust for resources, skills and needs of participants	<b>Evidence-Based Strategies</b> – respects and draws upon traditional evidence/scholarship
		<b>Capacity Building</b> – seeks to build capacity of stakeholders to conduct evaluations
		<b>Accountability</b> – seeks data on outcomes and demonstrates accountable use of resources

# Participatory Evaluation: Workshop

Why are you interested in participatory evaluation?

- To provide stakeholders a meaningful voice
- To increase the relevance of the evaluation
- To widen the perspectives and insights
- To strengthen the capacity for data collection
- To increase ownership of process and results
- Other

What approach to participatory evaluation do you think would be most useful for your work right now?

**Collaborative**

Evaluator is the lead:  
stakeholders with  
meaningful input

**Participatory**

Evaluator and  
stakeholders  
co-design and  
implement

**Empowerment**

Stakeholders lead.  
Evaluator is critical  
friend, coach, and  
facilitator

Why?

	Readiness		
	Low	Medium	High
Stakeholders interested in participatory evaluation ...			
Stakeholder understand the principles, steps and methods of participatory evaluation			
Stakeholders are prepared for the extra time and effort required			
The timelines and resources to undertake participatory evaluation are available.			
We have access to evaluators experienced in participatory approaches.			
Comments:			

What questions are emerging about participatory evaluation?

What are my next steps?
