THE FOUR INTEGRATED ROLES OF A FIELD CATALYST

LARGER SOCIETAL SYSTEMS

1. Mobilize knowledge, investments and partnerships
   - Engage key stakeholders & lived experience voice to understand issues, surface priorities and guide program design

2. Create preliminary frameworks & models
   - Broker & administer funding
   - Convene Learning Community
   - Coaching & support on CI model
   - Tools, workshops, webinars & case studies

FIELD CATALYST
(Tamarack Institute)

3. Assess, codify and refine CI model
   - Identify levers for policy & systems change
   - Disseminate activities and learnings

4. Make local work “visible”
   - Share insights and evidence
   - Advocate for specific systems and policy changes

COMMUNITY EXPERIMENTATION, DELIVERY, ADAPTATION

Local, community-specific knowledge, culture, context to drive grassroots innovation, adaptation and change in program models and strategies.
