Director, Evaluating Impact
Tamarack Institute

3

Gratitude & Acknowledgement

We begin this workshop by acknowledging that we are meeting on Indigenous land. As settlers, we are grateful for the opportunity to meet and we thank all the generations of Indigenous peoples who have taken care of this land.

As settlers, this recognition of the contributions and historic importance of Indigenous peoples must be clearly and overtly connected to our collective commitment to make the promise and the challenge of Truth and Reconciliation real in our communities.

4

In the Tamarack **Learning Centre** we support our learners in the **five interconnected practices** that we believe lead to impactful **community change**.

In **Vibrant Communities** we support **cities and local leaders** to implement large-scale change initiatives to **reduce poverty** and **deepen community**.

5

Week of Webinar Series

- Monday, November 9th** Creating a Culture of Engagement with Lisa Attygalle
- Tuesday, November 10th** Inquiry and Deliberation With Liz Weaver
- Wednesday, November 11th** Asset Based Community Development with Sylvia Cheuy
- Thursday, November 12th** Facilitating Co-Design with Liz Weaver
- Friday, November 13th** Participatory Approaches to Evaluation with Pamela Teitelbaum

6

Goals for today

What is stakeholder-engaged evaluation?
 How is it different from conventional evaluation?
 Advantages and disadvantages of stakeholder-engaged evaluation

7

Why is literacy about evaluation important?

- Language of evaluation can often be intimidating and foreign to 'non-evaluators'
- Overwhelming number of choices to make about how to go about doing evaluation work
- Can feel like a daunting task

8

9

Conventional Evaluation	Community-Engaged Approaches to Evaluation
<p><u>Why do it?</u></p> <ul style="list-style-type: none"> Accountability and for evidence of results - usually summative to determine support should continue to support intervention. Understand whether results were achieved. <p><u>Who's leading it/involved?</u></p> <ul style="list-style-type: none"> External evaluation professionals, Senior managers Beneficiaries and stakeholders involved in information gatherings as informants only <p><u>When does the evaluation take place?</u></p> <ul style="list-style-type: none"> Primarily upon completion, and sometimes mid-way. <p><u>How measurement is defined?</u></p> <ul style="list-style-type: none"> Externally defined indicators mainly quantitative, cost-related, Uses 'scientific objectivity' where distancing of evaluator from participants/target of evaluation is valued, Uniform procedure, limited access to results, non-transparently. <u>What is it about?</u> Predetermined indicators of success that are associated mainly with cost and implementation outputs 	<p><u>Why do it?</u></p> <ul style="list-style-type: none"> Accountability and transparency, collect evidence of impact Empower local actors - control over actions from outcomes and learning and implement changes that are necessary. Strengthen relationships among collaborators <p><u>Who's leading it/involved?</u></p> <ul style="list-style-type: none"> Community organization(s), stakeholders, facilitator (often an evaluation professional/expert). <p><u>When does the evaluation take place?</u></p> <ul style="list-style-type: none"> Continuously implementation More strategic cycle of evaluation design - parallel to implementing intervention design. Considers monitoring process an important aspect of the evaluation design. <p><u>How measurement is defined?</u></p> <ul style="list-style-type: none"> Internally defined indicators, shared measurement concepts and metrics, auto-evaluative, qualitative methods valued <p><u>What is it about?</u></p> <ul style="list-style-type: none"> Defining and designing indicators is a shared process by a team of stakeholders and evaluation professionals taking on different roles depending on the type of participatory or collaborative evaluation approaches selected

10

Advantages and Limitations of Participatory Evaluation

Advantages

- Questions stay locally & culturally relevant leading to higher value among community members
- Greater accuracy & relevance of findings
- Encourages locally ownership of outcomes and findings
- Improves understanding of interplay between causality and transformative learning
- Improves program performance - community actions
- Empower informants/participants
 - Encourages meaningful engagement practices
 - Builds capacity of local actors from leaders to citizens
 - Strengthens connections among leaders and build and strengthen relationships overall
- Sustain organizational/community learning and growth
- Greater opportunity to scale learning and practices

Limitations and Risks

- Greater investment
- Higher resource allocation to capacity building
- Duration of process
- High level of commitment
- Greater potential for conflict
- Lack of experience and skills in evaluation design and implementation
- Unclear roles and leadership
- Misalignment of design and implementation
- Lack of facilitation skills

11

Using Evaluation Finding and Process

EVALUATION

Leads to new learnings, strategies
 Shifts in thinking and mindset
 Demonstrates evidence of impact
 Shifts in approach to the work
 Contribute to producing change itself

Findings Use

Instrumentally - Direct application of knowledge

Conceptually - No action taken but thinking is affected

Symbolically - Supports a direction of thinking

Process Use

Strengthens credibility and ownership
 Builds evaluation capacity

Learning-focused
 Strengthening networks and relationships

Establishing a shared understanding and common ground

12

Collaborative, Participatory, and Empowerment Evaluation

Stakeholder Involvement Approaches

David M. Fetterman,
Liliana Rodríguez-Campos,
Ann P. Zukoski, and Contributors

With your ongoing support we can make this evaluation a success.

Collaborative

Working together, we will make this evaluation a success.

Participatory

We'll have help, but the success of the evaluation is in our hands.

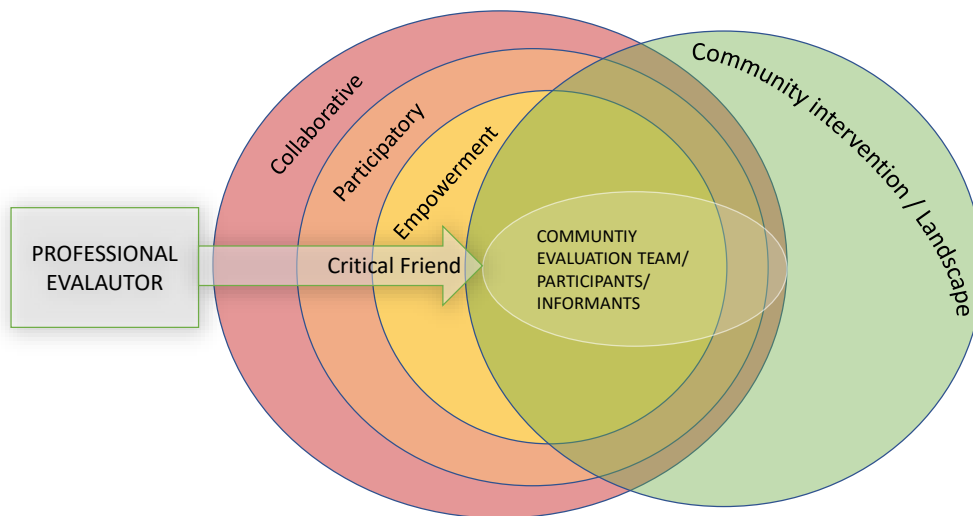

Empowerment

Chris Lysy

Fetterman, D. M., Rodríguez-Campos, L., & Zukoski, A. P. (2018). *Collaborative, Participatory, and Empowerment Evaluation: Stakeholder Involvement Approaches*. The Guilford Press.

ROLE of the Professional Evaluator in the 3 types of community-engaged evaluation processes

Stakeholder-engaged evaluation practices

strong appreciation of centering stakeholders as a part of the evaluation team, at the level of designing & developing the process, tools and/or involved in data collection, analysis, reporting.

Supports critical learning throughout the duration of a project cycle allowing for corrections to be made while on course
At the end of a cycle and in follow up – demonstrate impact

15

Assessing the degree of readiness to plan and conduct stakeholder/community-engaged evaluation

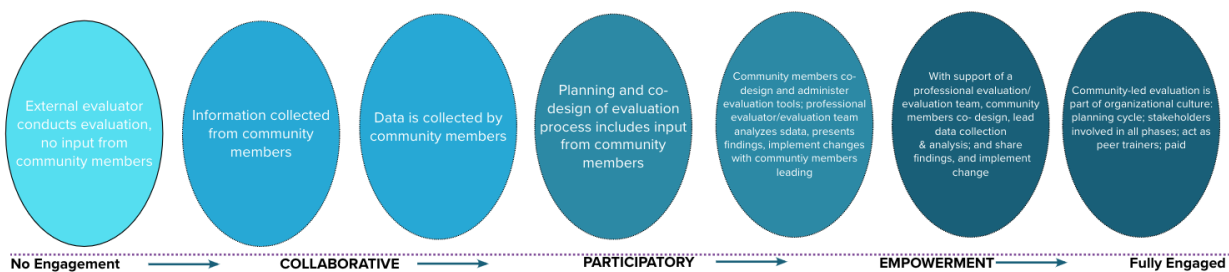

TOOLS

16

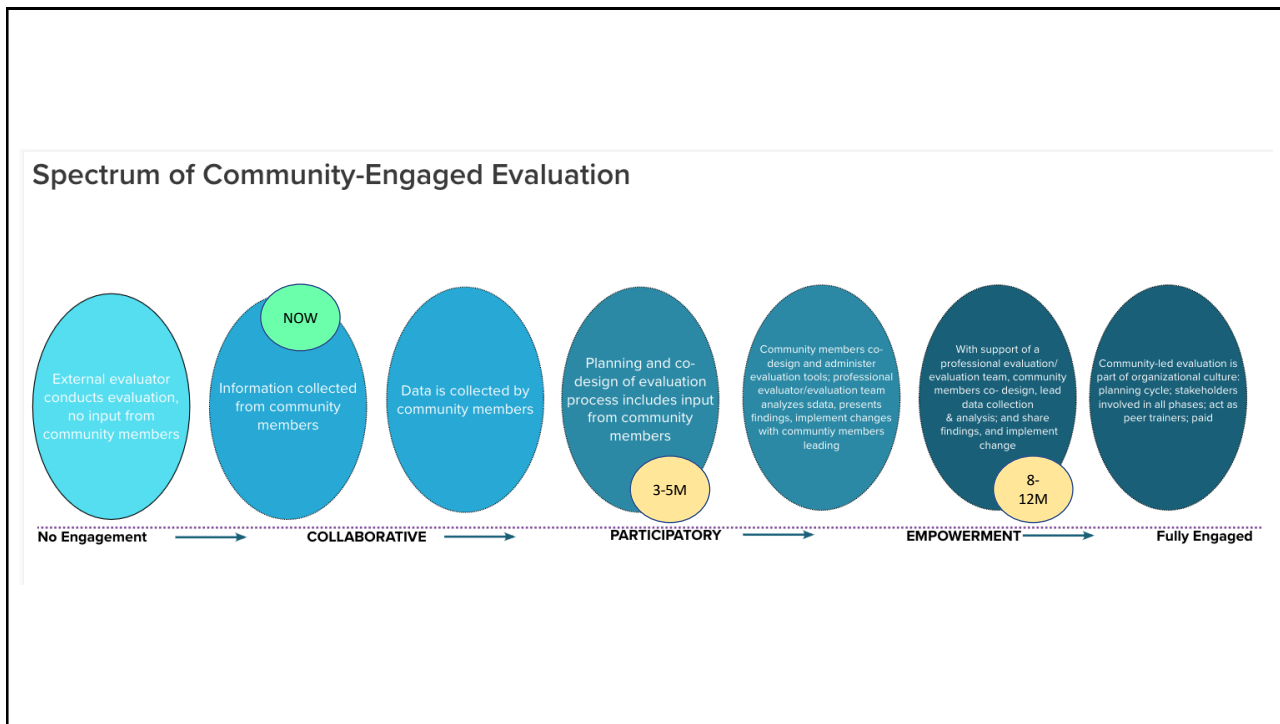

To what extent do you or your organization employ stakeholder/community-engaged evaluation practices?

17

Spectrum of Community-Engaged Evaluation

18

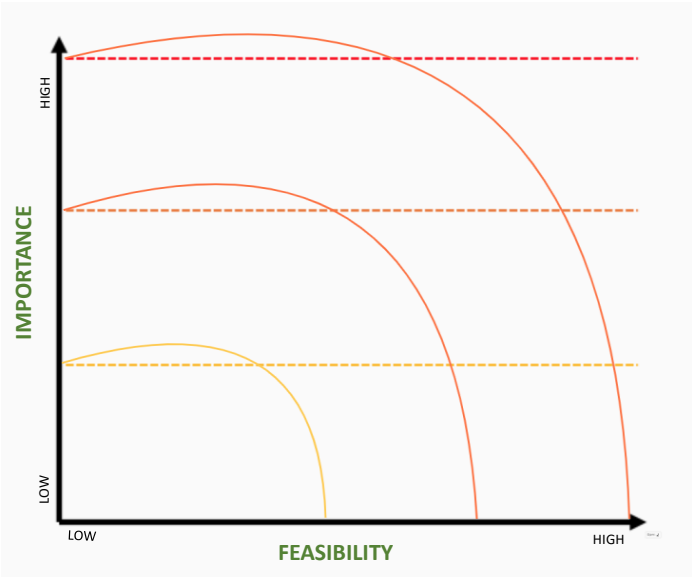

19

To what degree is transparency, learning and consent feasible and important in your evaluation?

Consider Who, What, Why? Where? How?

20

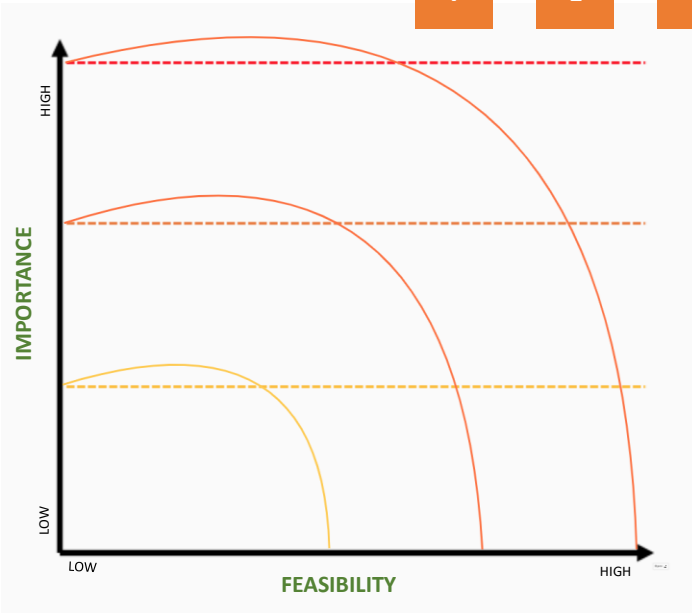

The graph shows three curves representing different levels of importance and feasibility. The y-axis is labeled 'IMPORTANCE' with 'LOW' and 'HIGH' markers. The x-axis is labeled 'FEASIBILITY' with 'LOW' and 'HIGH' markers. Three curves are shown: a top red curve, a middle red curve, and a bottom yellow curve. Each curve is bounded by a horizontal dashed line of the same color, indicating a threshold of importance. The curves show that as feasibility increases, the importance of a project also increases, but eventually levels off or decreases.

Adding Transparency, Learning & Consent (T.L.C) into Your Evaluation Practice

21

T L C

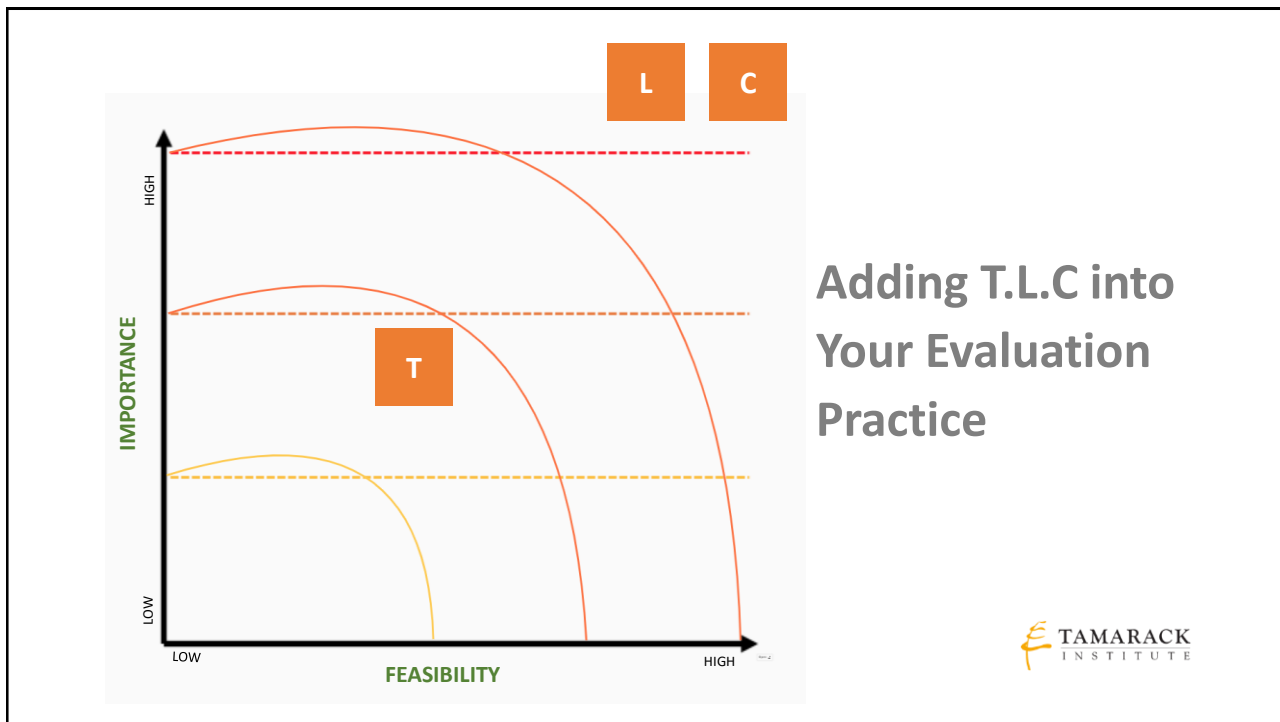

The graph is identical to the one on slide 21, showing three curves (red, red, yellow) representing importance vs feasibility. Above the graph, the letters 'T', 'L', and 'C' are displayed in orange boxes, representing the acronym T.L.C. The text on the right is 'Adding T.L.C into Your Evaluation Practice'.

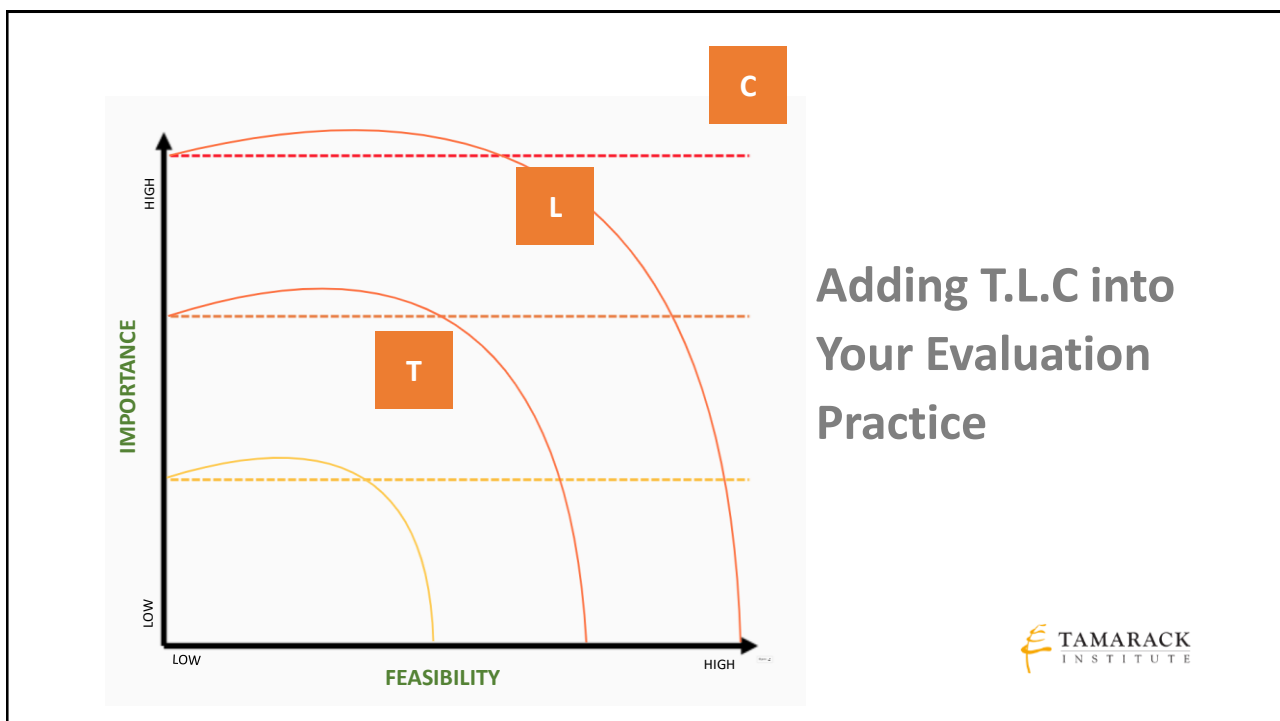

Adding T.L.C into Your Evaluation Practice

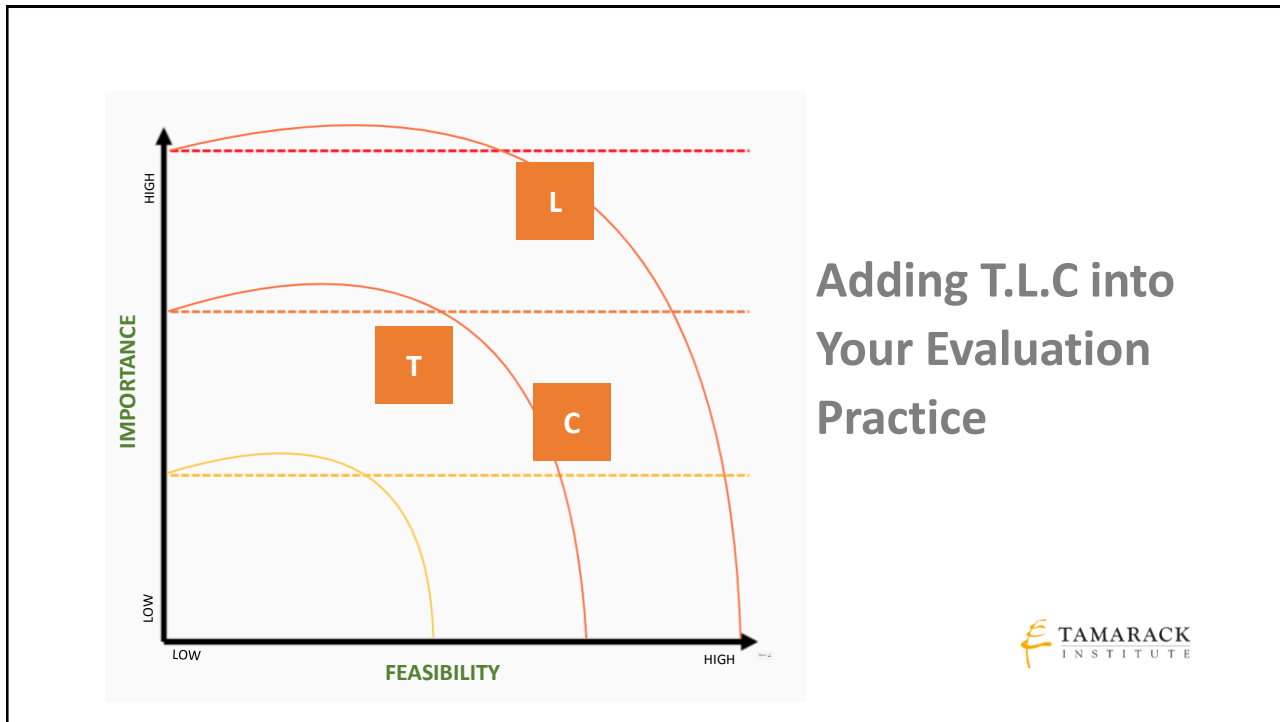

22

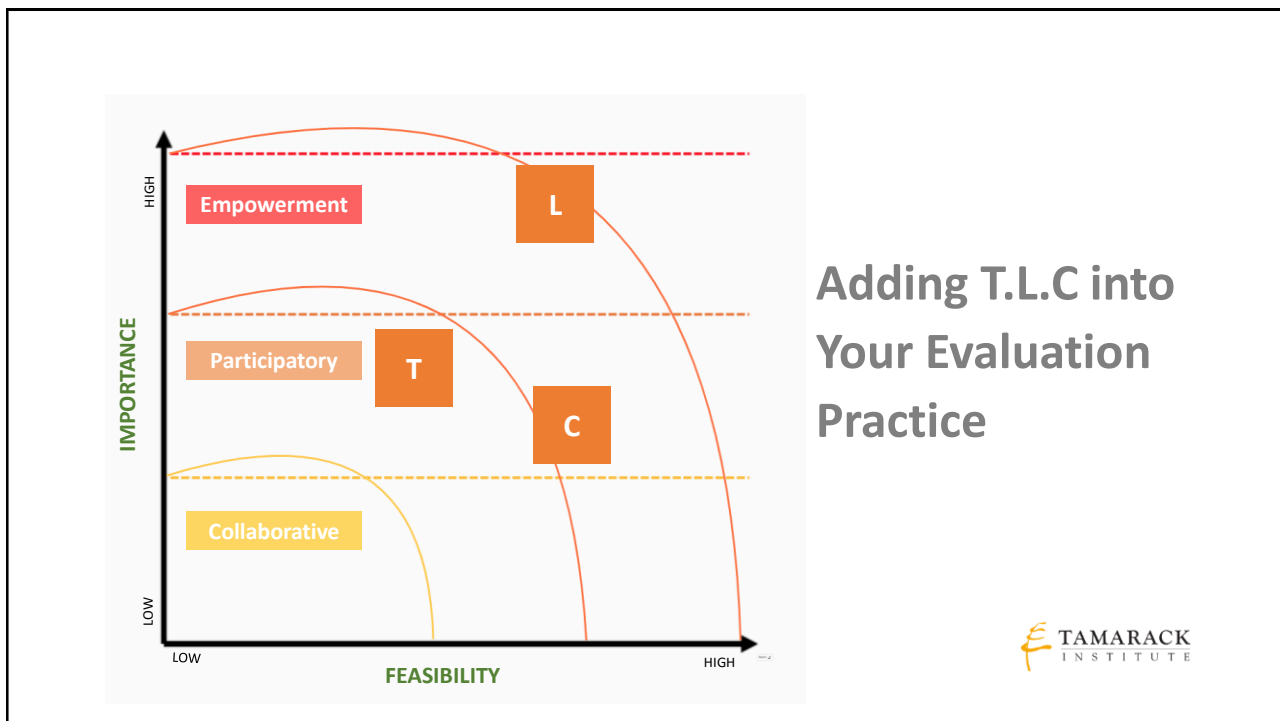

23

24

25

26

How can the evaluation process be inclusive, reflective & empowering?

How can we build consensus throughout the evaluation cycle?

27

APPLYING AN EMPOWERING ENGAGEMENT APPROACH TO THE EVALUATION CYCLE

STEP ONE: VALIDATING KEY ACTIVITIES TO BE EVALUATED

NAME

ACTIVITIES: List the top activities you think are most important to reaching our goals using the sticky notes (space below)

Name

FUNDING

YOUTH
ENGAGEMENT

Name

CAPACITY
BUILDING

FUNDING

Name

YOUTH
ENGAGEMENT

CONSENT OF
PARTICIPANTS

ETC...

SHARING RESULTS
WITH
STAKEHOLDERS

YOUTH
ENGAGEMENT

28

STEP 2: TAKING STOCK

Applying a democratic, transparent process that shows the values of the group. It honors the existing mission of the intervention but also respects the voices & energy in the room. Key word is consensus - Can you live with it?

5-10 ACTIVITIES

What are the key activities that help us achieve impact

**Prioritization of Activities:
Use dots to indicate your priorities**

29

STEP 3: TAKING STOCK: RATE THE LEVEL OF EFFECTIVENESS EACH ACTIVITY

Each person uses the rating scale

1 (Low level of effectiveness) to 10 (Very high level of effectiveness)

5-10 ACTIVITIES

Activity	PT	LA	SC	LW	DF
FUNDING	4	2	7	7	5
COMMUNICATIONS	3	4	7	8	7
YOUTH ENGAGEMENT	2	9	4	3	1.5
SHARING RESULTS WITH THE STAKEHOLDERS	4.5	3	6	4	4
CAPACITY BUILDING	5	2	7	6	6
TOTAL	18.5	20	31	28	23.5

Suggested reflection questions

Review what the results are, and discuss why you rated these activities the way you did?

What are the factors contributing to its current status?

- Hindering
- Supporting

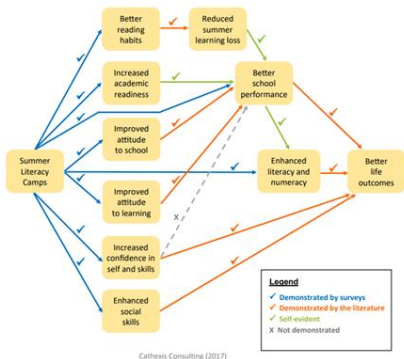

What can we do to strengthen the activities?

What other activities need to be considered?

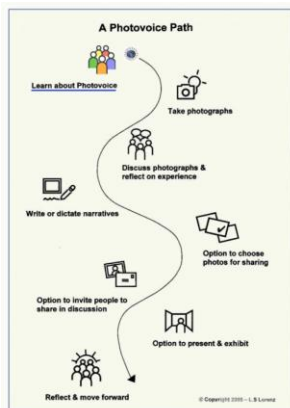

How are the activities influencing changes / helping to remove barriers?
